Cloud Center of Excellence

Introduction & Background

Our Purpose

Create well-being for
people and planet by
transforming spaces
using daylight and
fresh air

37

**countries with sales
companies**

21

**production companies
in 12 countries**

~11,700

**employees
globally**

Sharpening our strategic focus

New growth strategy focusing on end-customer proximity, requiring dual focus and a strong IT foundation...

**Protect and develop core
business**

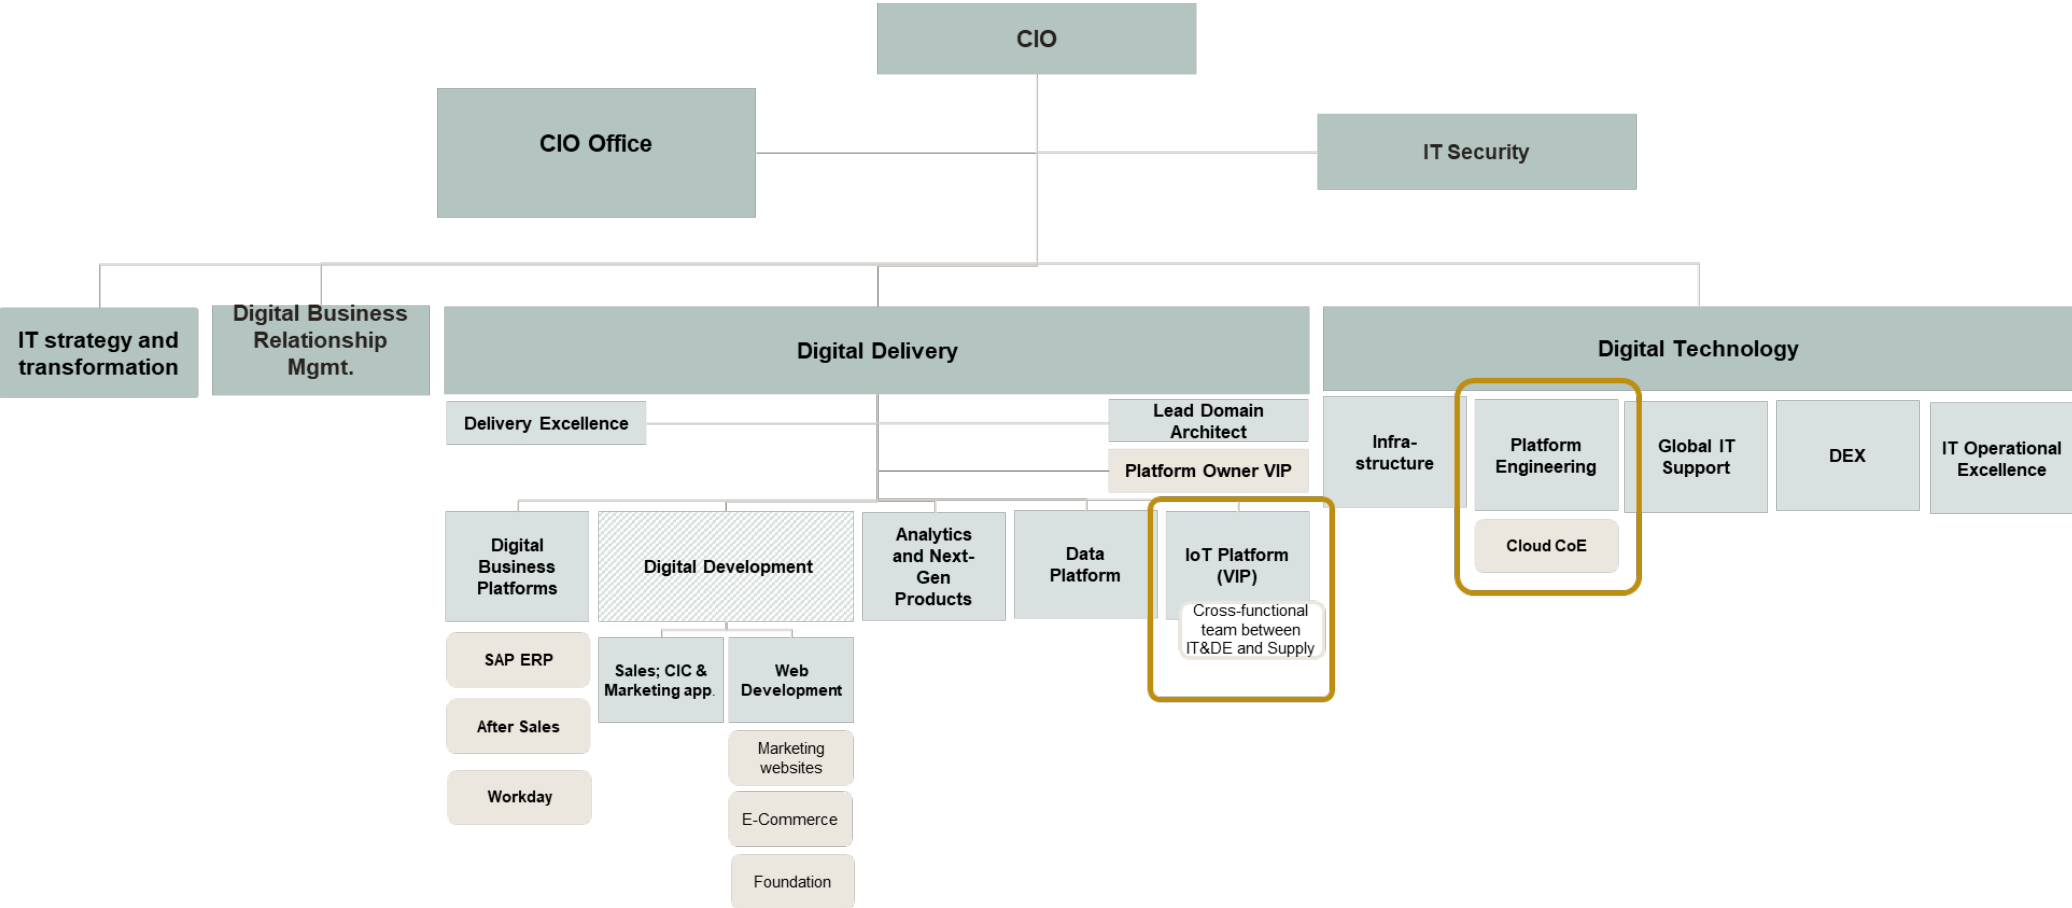

Well-known domains for IT...

**Stimulate more
customer pull**

**...New territory and
ways of working**

Cloud Centre of Excellence (CCoE) is leading the transformation towards a product mindset

Cognitive load must go down

Developer Cognitive Load

Cognitive Load Theory

Categories

Schemas

Intrinsic

The intrinsic cognitive load focuses on factors such as task complexity, problem-solving demands, learning Requirements and technical challenges.

12 Factor App

Technical Agile Coach

Quality Assurance

Architecture

Extraneous

The impact of external factors, such as unclear documentation, tool complexity, communication issues, and redundant processes.

Onboarding

Where we put our effort

Germane

Linking new info with current info.
We read "growing domain capabilities"

External consultancy

Domain expert advice

Complicated subsystems

The first experiment

From Projects to Platform + Projects

VS

The big Cloud Native toolbox

Developers should describe their domain
in their language only.

The platform should transform that into
what the platform needs.

How we work

CCoE is fully distributed

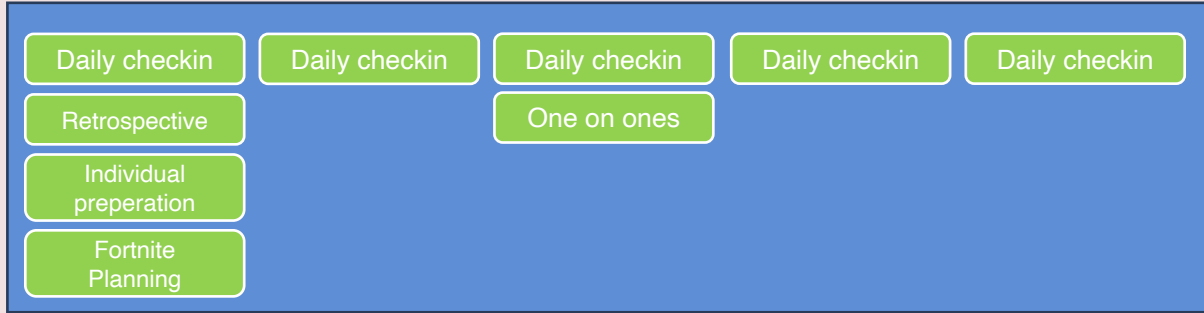

5 men

5 women

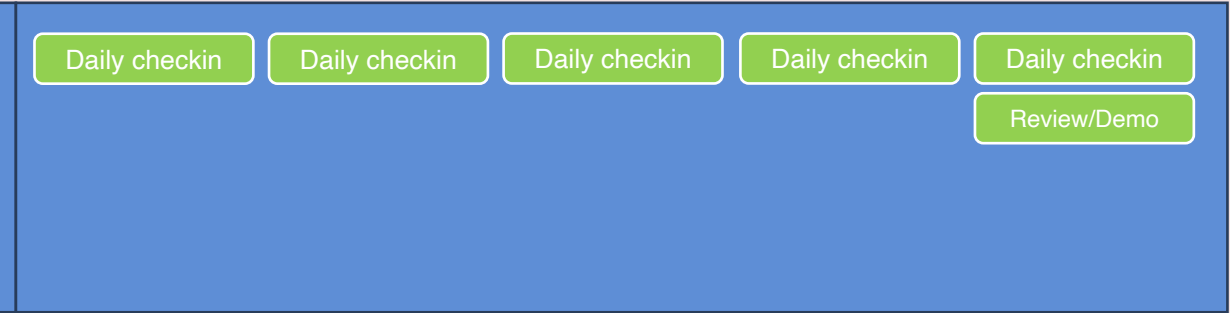

Weekly ceremonies in CCoE

Week #1

Week #2

- We plan 14 days only
- We spend ~15 min on planning
- Planning = understanding what's most important
- We have no backlog when planning starts
- We create tasks as we start them

Backlog overview

 	Order	Work Item Type	Title
	1	Epic	>  Q4 - Application development
	2	Epic	>  Q4 - Application team support
	3	Epic	...  Q4 - DevX
		Feature	>  Backstage
		Feature	>  Bura
		Feature	 MakeIT
		Feature	✓  Tanto
		Product Backlog Item	>  Tanto-iteration 5
		Product Backlog Item	>  Tanto-iteration 6
		Product Backlog Item	>  Set up Windows VM for testing Tanto
		Task	 add a changelog to tanto-cli
		Feature	>  Panko
	4	Epic	>  Q4 - Messaging
	5	Epic	>  Q4 - Kubernetes platform maintenance
	6	Epic	>  Q4 - Kubernetes platform development
	7	Epic	>  Later: CommVault AKS DR

- We don't estimate tasks
 - We don't calculate velocity
 - We don't calculate capacity
-
- We talk to our customers
 - We do the important things first

Daily support

Building a platform as a product

- We have **no external stakeholders**
- We **find pain** and fix it with technology
- We build feedback into our products
- We **love** our customers

Wardley mapping Developer Experience

The result is speed

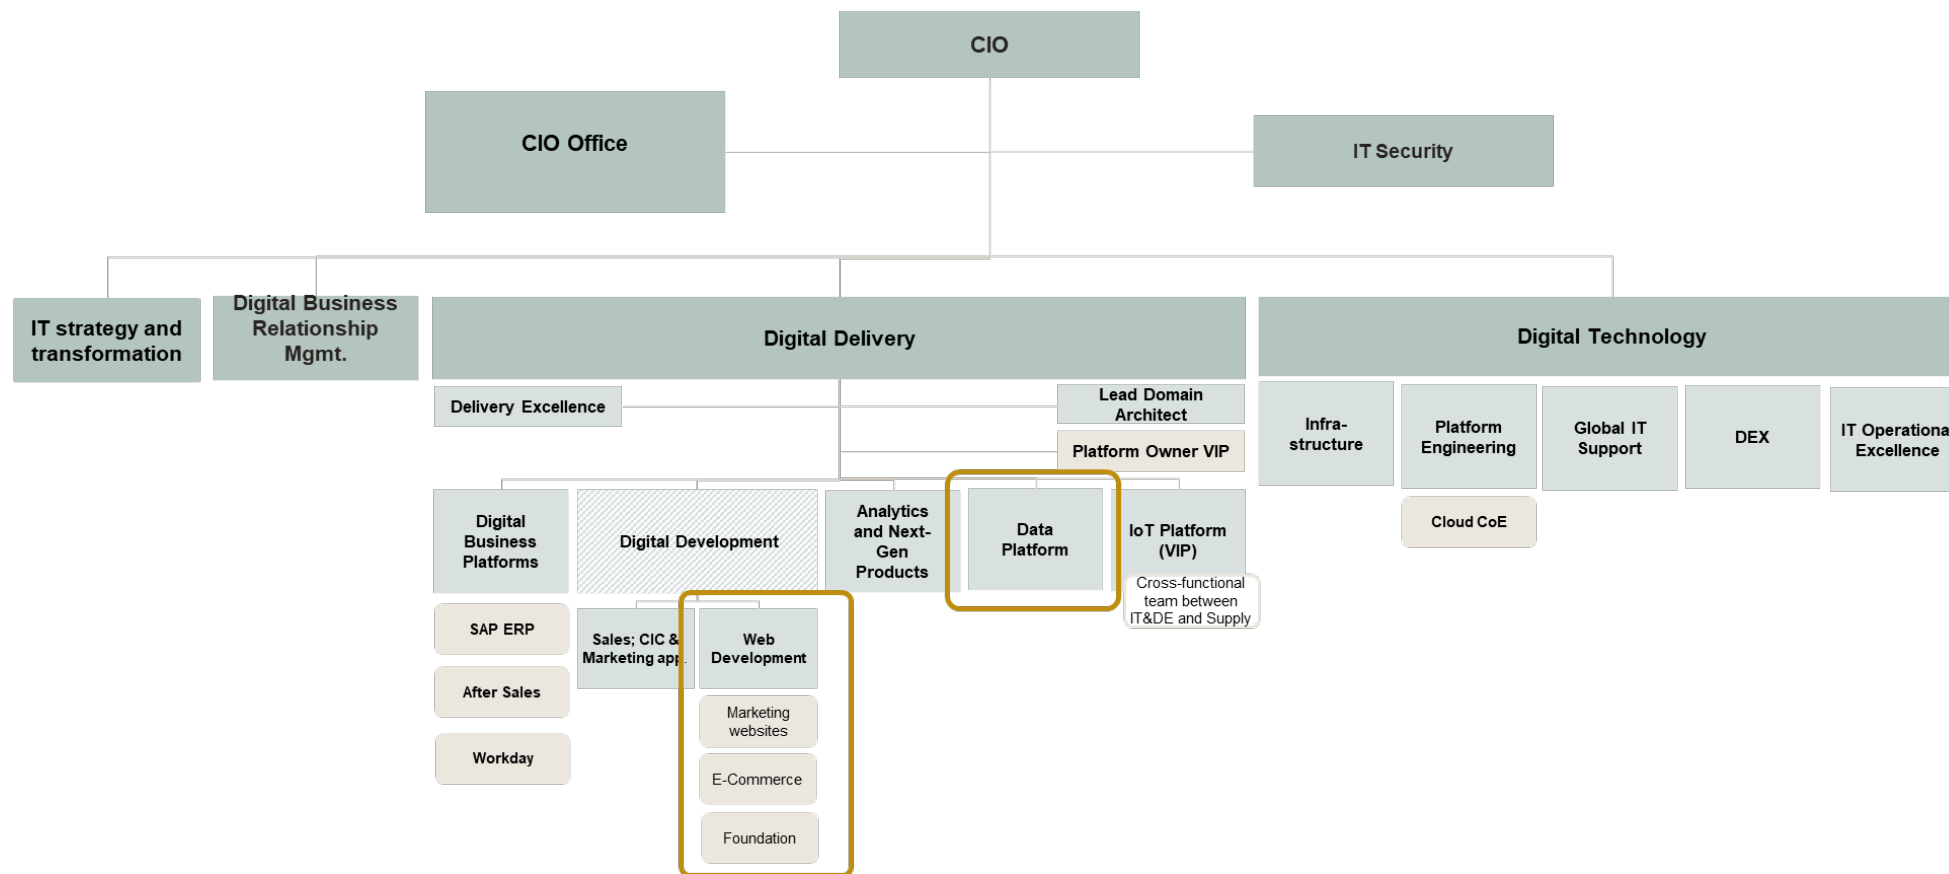

We had **1219 releases** in 30 days

Total of 4452 since January 2023

Releases per month

...We are now expanding to other areas, onboarding new platform teams and customers

Anyone with relevant experience from data platform and SiteCore domain?

We would love to hear from you!

THANK YOU
